## I Understand That:

1. The donor's body must be cremated following the donation process and that un-cremated remains will never be returned to my Next of Kin.
2. Only cremated tissues (anatomical specimens) that have not been used for medical research and education will be returned to my Next of Kin.

6. I understand that the cremation process will completely destroy all material left with the body, including dental fillings and personal effects, and such items will not be recoverable. Metals recovered from the cremated remains will be processed by the crematory, or recycling company, and cannot be returned.
7. Any implanted medical devices (pacemakers or radioactive seed implants) left in the body at the time of death can pose a serious health and safety hazard during the cremation process and must be identified and removed prior to the cremation process.
8. My authorized agent may direct the removal of any medical device/personal effects accompanying my body at the time of donation. In the absence of this directive, I understand that such personal effects will be destroyed if uncollected prior to donation.
